

IMER Mix 120 Plus Vertical Shaft Mixer

Features:

- ♦ Perfect for 2-4 man construction crew. The Mortarman 120+ can make a wheelbarrow of mortar, stucco, grout or dry pack cement every 3 minutes.
- ♦ Vertical shaft mixers deliver so much mixing torque that the 120+ can out produce a 2 bag towable mixer when making dry pack cement.
- ♦ Mix anywhere - The 120+ can go anywhere because it fits through standard doorways. Mixing action is neat and controlled so the mud stays in the drum and the mix discharge is equally clean.
- ♦ Reverse it - If the material starts to clump or separate, just hit reverse for a few seconds...then back to forward. The ability to switch from forward to reverse ensures that all types of material mix well.
- ♦ Vertical shaft mixers rock! - The paddles are always in the mix, working hard. Material is blended without air entrapment, and even stiff muds are mixed thoroughly and quickly.

Specifications

Mixer type	vertical shaft mixer
Drum capacity	4 1/2 cu. ft.
Batch output	3 cu. ft.
Drum diameter	30 inches
Maximum Aggregate Size	3/8 inch
Paddle Speed	38 rpm
Motor	2 HP, 110V, 15A
Noise	70 dB(A) - real quiet
Dimensions	33" L x 30" W x 50" H
Weight	286 lbs. (310 lbs. crated)
